

Dr. rer. nat. Steffen Haack

01.04.2025

President of the Executive Board of Bosch Rexroth AG

Dr. Steffen Haack has accepted the position of President of the Executive Board of Bosch Rexroth AG effective August 1, 2022. He is responsible for the corporate department in charge of strategy and business development, engineering activities, corporate communications and the mobile solutions business.

Since January 2021 he has again been a Member of the Executive Board of Bosch Rexroth AG, appointed as Chief Technology Officer. The main task is the electrification of all drive technologies for connected solutions in industrial and mobile applications.

From 2017 to 2021, he was President of the Business Unit Industrial Hydraulics. Previously Steffen Haack was a member of the Executive Board of Bosch Rexroth AG from 2015 to 2017 with responsibility for the Business Unit Industrial Applications. The technology focus was on linear and assembly technology, electric drives and controls, including tightening and welding technology, as well as industrial hydraulics, including large drives and large project business.

From 2012 to 2014, Steffen Haack was President of the Executive Board of Bosch Solar Energy AG.

From 2010 to 2012, he was responsible for Sales Factory Automation in the Business Unit Industrial Applications of Bosch Rexroth AG. The technology focus was on linear and assembly technology, electric drives and controls, including tightening and welding technology and pneumatics.

From 2008 to 2010, he assumed responsibility for the Electric Drives and Controls Division of Bosch Rexroth AG.

Haack studied mechanical engineering at the University of Applied Sciences in Erfurt. In 1991, he gained a PhD in fluid technology at the faculty of mathematics and natural sciences at the University of Erfurt. In 1996, he joined the Bosch Group.

In addition to his professional activities, Dr. Steffen Haack is Chairman of the Executive Board of the Fluid Power Association of the German Engineering Federation (VDMA) and of the Advisory Board of the German Mechanical Engineering Summit. He is an appointed visiting professor at the universities in Zhejiang and Yanshan and lectures at the Technical University of Dresden on fluid-mechatronic systems engineering.
